Slideway Oils

PETRONAS SLIDEWAY

PETRONAS Slideway Series is a range of high-performance lubricants specially developed for machine-tool ways and slides where precision or slow speeds make it necessary to eliminate the 'stick-slip' of tables and slides.

Formulated with high quality selected mineral base oils enhanced with advanced antioxidant, anti-rust, extreme pressure, anti-wear and anti-foam additives, our slideway oils provide excellent separation from water-miscible cutting fluids, high antiwear protection and a combination of adhesiveness and stick-slip characteristics ensuring smooth operation of the machine tools.

Product Range Availability May 2024		
FG	SKU	Material
